

North American Substation Services, LLC (“NASS”), the leading independent provider of mission-critical installation, maintenance and repair services for substation equipment across the United States, is pleased to announce the acquisition of Nomos Systems (“Nomos”).

Nomos is a leader in designing, engineering and manufacturing control cabinets for various high voltage equipment including transformers, breakers and LTCs, as well as selected industrial applications. Nomos’ engineering capabilities enable them to provide customized solutions to a blue-chip list of global OEM customers and North American utility companies. Nomos’ capabilities range from designing control cabinets for new transformer installations to upgrading and replacing control cabinets with state-of-the-art equipment for existing assets as part of a life extension program. Nomos provides its customers with a one-stop solution, from engineering through startup.

"This acquisition will allow NASS to expand our service offering and deepen our relationships with our utility customers. Nomos’ management has built an impressive organization that shares our focus on quality and customer service, and has assembled a great team. We are thrilled to welcome Nomos into the NASS family of companies," said Mark Roberts, President & CEO of NASS.

“NASS is the perfect partner for Nomos to expand our relationships to develop new solutions for our customers. We are very excited for the next stage in Nomos’ life as part of the NASS family," said Jacques Delisle, President of Nomos.

Nomos operates from its headquarters facility located in Quebec City, Quebec. Nomos’ management team will continue to lead the business.
